

Landscape Architects/Designers—

Seattle, San Francisco, Los Angeles

At Mithun, our design has purpose—to create positive change in people's lives. We are an internationally recognized leader in planning and design, with a focus on sustainable performance, human health and social equity. We are a JUST organization and embrace justice, equity, diversity and inclusion (JEDI) as key expressions of our mission of Design for Positive Change. We are committed to promoting JEDI both internally and externally, in our firm culture, project work and partnerships. Our goal is not just good intentions but real impact for the people, communities and clients we serve.

We are looking for Landscape Architects and Landscape Designers who are interested in and prepared to do continuous learning in support of resilient, community-centered and culturally equitable design. Our work spans multiple scales and partners – across public, private, non-profits, community-based organizations, philanthropy and research. Our dynamic team is one of shared curiosity, careful listening, appreciation and learning from each other's experiences.

Qualified candidates have a degree in Landscape Architecture, or related experience, are technically-strong, concept-driven and are proficient with visual and digital communication skills, ideally including InDesign, Photoshop, GIS, Revit and AutoCAD. Whether you bring your experience in detailing, graphics, mentoring, project management and more, opportunities and roles vary by project and experience level, and could range from project pursuits, through concept, schematics, design development, construction documents and construction administration.
