

Siegel & Strain Architects has an opening for a Project Architect

Siegel & Strain Architects is a vibrant, award-winning, women-owned, 28-person East Bay firm with a diverse range of projects. We are a design- and research-oriented practice with a national reputation for advancing sustainable design. We work with innovative sub-consultants and use forward-looking materials and systems. Our portfolio includes civic and educational projects, camps and retreat centers, schools, recreational buildings, custom homes and historic buildings. Our work can be viewed at www.siegelstrain.com. Current projects in design include:

- Several National Park Service projects including visitor centers and historic renovations.
- Lab, office, and maintenance support facilities for local utilities.
- Rehabilitation of former Coast Guard facilities to serve as affordable housing in West Marin.
- A major addition to a church in Berkeley.
- Civic, community, maintenance, and overnight camp facilities for the City of Berkeley.
- Facilities in San Francisco's Golden Gate Park.
- An urban campus in North Oakland for a community-serving organization.
- A youth camp in Southern California.
- Retreat centers for non-profit groups in Marin and Sonoma Counties.
- A fire recovery project for a university field campus in rural Santa Cruz County

We typically work in collaborative teams of two or more people each with specific roles and responsibilities on individual projects. We are looking for a self-starting project architect to work on projects from pre-design through construction phase.

QUALIFICATIONS

- Degree in architecture from an accredited architecture program
- 5-7 years of experience in architecture offices
- Strong design skills
- Ability to research, problem solve, and iterate design solutions
- Proficiency in Revit, AutoCAD, Sketch-up, and Adobe Suite
